

As parents, it is not your job to replace your children's teachers. What schools normally do in a six-hour day can be done in two hours at home, because school day schedules consist of other things besides learning. Experts do mention that keeping a regular learning schedule for kids and teens is a must. The idea is to use academic activities to fill learning gaps left by the school closures. Another important factor is the outdoors, as long as you can maintain social distancing, experts recommended spending time outdoors to avoid being cooped up.
